Health Nugget

Knee pain and stiffness is related to a condition called Osteoarthritis. Osteoarthritis is caused by wear and tear of the knee joint and also by injury to the joint. It is shown that the more weight that is lost, the greater the apparent benefit for delaying or preventing knee joint degradation in Osteoarthritis. If you are suffering from knee pain or stiffness, consider losing some weight. Weight loss has been shown to improve pain and stiffness of the joint.

SABBATH SCHOOL CLASSES

Adult Classes

Youth Class

Children’s Classes:

Cradle Roll - Junior Classes

March 25, 2023

“Aware that His disciples were grumbling about this, Jesus said to them, ‘Does this offend you? Then what if you see the Son of Man ascend to where He was before! The Spirit gives life; the flesh counts for nothing. The words I have spoken to you – they are full of the Spirit and life.’”

John 6:61-63 (NKJV)
